A wide range of fittings and
adaptors, available separately as
well as with
an extended lower range
flowmeter

FITTINGS, ADAPTORS AND FLOWMETER

The adaptors can either be fitted directly to the flowmeter via the 1/8 NPT thread or can be fitted to the 1/4" hose barb for use as remote adaptors.

The dual taper flowmeter is back pressure compensated with a precision flow control valve delivering an accuracy of ± 0.75 l/min and is filtered throughout. The chrome plated brass body and polycarbonate tube cover offer a high degree of durability to these units. The flowmeter is calibrated at 50 psi.
