Manufactured under licence of
Dräger-Germany

CINNA

Portable Anesthesia Apparatus

SPECIFICATIONS

Plastic coated main body with two locks on either side to lock the dust proof cover. Also features a swivel arm to accommodate breathing circuits. Rail to accommodate one Vaporizer. Large handle facilitating easy transport.

Dimensions : 400 x 400 x 270 mm (L x W x H)

STANDARD EQUIPMENT (BASIC UNIT)

Oxygen and Nitrous Oxide Flowmeter

Ranges	: O ₂	: 0 – 10 L/min
		N ₂ O : 0 – 10 L/min
Accuracy	: VDI/VDE 3513 class 2.5	
Special Features	: Color coding on tubes. Float with white spot to observe rotation	

Oxygen Flush and Nitrous Oxide Cut-off

As standard, the Cinna is equipped with an oxygen flush valve which is placed at the front for easy and quick access, and an in built Nitrous Oxide cut-off device which stops the Nitrous Oxide flow in case there is an Oxygen supply failure.

Oxygen and Nitrous Oxide Inlets

Provided at the rear of the unit for unobstructed connections. Inlets are gas specific and manufactured according NIST.

Mixed Gas Outlet

Threaded connection to safeguard accidental loosening or disconnection and mixed gas connection hose.

Pressure Regulators and Connection Hoses

One each pressure regulator for Oxygen and Nitrous Oxide and one each, 5 m hose with appropriate connections for Oxygen and Nitrous Oxide.

PLEASE SELECT

Basic Unit	MD 23433
Dräger Halothane Vaporizer, Vapor 2000, rail mounting	MD 51405
Dräger Enflurane Vaporizer, Vapor 2000, rail mounting	MD 51410
Mark III Vaporizer, Halothane	MD 51455
Mark III Vaporizer, Enflurane	MD 51460
Ether Vaporizer	MD 51475
Magill open system complete with hoses and masks, according to ISO norms	MD 26130
Circle System DA, complete with 1 kg absorber, hoses and mask	MD 51500
