

MEDICAL GAS TERMINAL UNITS

Complete range
according to British
standard

BS EN 737-1 : 1998

MEDICAL GAS TERMINAL UNITS

APPLICATIONS

The ProTerm7 range of medical gas and vacuum Terminal Units are suitable for installation into piped medical gas installations within a hospital or laboratory environment.

Special emphasis and consideration at the design stage has resulted in a terminal unit which is quick and easy to install and maintain, thus reducing installation time and cost.

The terminal unit is manufactured under strict quality controls in which every terminal unit is subjected to full pressure and functionality tests prior to dispatch.

MAINTENANCE

The unit requires the minimum amount of routine maintenance, which-due to the '100% shutoff capability'- can be carried out in a matter of seconds without the need to isolate the system.

BENEFITS

- The units are designed to comply fully with the requirements of BS EN 737-1: 1998.
- The terminal unit is suitable for surface, flush, bed-head, and pendant mounting.
- 100% sealing for ease of servicing.
- High flow capabilities.
- 15mm pipe stud connection as standard with options available to suit specific customer requirements.
- Full range of spare parts always available.
- Available for the following medical gas services: Oxygen, Nitrous Oxide, Medical Air 400 kPa, Surgical Air

Air

700kPa, Medical Vacuum, Entonox, and AGSS.
